Dear Ms. Miriello,

The U.S. Environmental Protection Agency is required by law to establish administrative records "at or near a facility at issue." The administrative record consists of information upon which the Agency bases its selection of a response action for Superfund sites.

By providing the public with greater access to these records, we hope that they will be better equipped to constructively comment on site activities and to understand the issues relating to the selection of the response action at the site.

We appreciate the Mifflin County Library serving as a designated field repository for the Jack's Creek/Sitkin Smelting & Refining, Inc. Superfund Site. The site's four (4) Administrative Records have previously been established and are available on the internet at <https://semspub.epa.gov/>. An Index of Documents for each Administrative Record is enclosed. Please refer parties interested in reviewing the record to the SEMS-Pub site and provide them with the Index. A quick reference search guide is attached to assist users of SEMS-Pub.

To ensure the receipt of the above information, I would appreciate your completion of the attached Notification of SEMS-Pub Availability Acknowledgment form. Please return this form upon receipt.

Again, I would like to thank you for your cooperation with the U.S. Environmental Protection Agency in serving as a field repository. If you have any questions or comments, please contact me at (215) 814-3157.

Sincerely,

Dorothy Swearingen
